

All the control in one powerful remote

A close-up photograph of a person's hand operating a black crane remote control. The hand is positioned over a red emergency stop button. The background is a solid red color.

A Polar Remote Controls System installed on your crane gives you an unmatched combination of freedom of movement and range, plus the total control of true proportional technology. Fully proportional Polar Remotes allow for smoother, more precise control of your equipment. And that means greatly improved safety and more efficient deliveries.

Improved efficiency

- Polar Remotes allow for the most effective use of both crane and operator.
- Remote operation of your crane is easier to learn than with manual controls and requires less training time on the equipment.
- On the job site, Polar Remotes reduce unloading times which allows for more deliveries per day.

Ideal for OEM and aftermarket installations

- Polar Remotes install on new and older truck cranes by working with a crane's existing hydraulic system.

POLAR 9900R

Radio Remote Features

- Fully proportional transmitter-receiver system
- Spread Spectrum 900 Megahertz radio frequency system
- A range up to 120 meters/400 feet without a cable
- Polar Radio system is immune to noise and interference with spread spectrum technology and built-in microprocessor safeguards. Any number of cranes can be operated in the same vicinity without any interference from each other.
- No special operator license required to use Polar Radio Remotes
- Hi performance rechargeable NIMH battery.
- Simple installation on existing Polar Remote 5300 systems.

POLAR 5300

Cable Remote Features

- Three to six fast and smooth fully proportional functions.
- Allows simultaneous operation of all functions, based on crane hydraulics configuration
- The Polar 5300 can be operated reliably at extreme temperatures
- Manual control always available to operator as the Polar 5300 can be disconnected from system
- Polar 5300 can easily be added to a crane anytime without changing the existing valve.
- Easy upgrade to Polar Radio 9900R system.

Radio or Cable Options

Choose between the extra convenience and versatility of our Polar Radio 9900R system, or an economical Polar 5300 cable remote control system. Either way you get proven performance and value.

Polar Remote Controls are manufactured in Canada and have provided operators with superb performance and reliability in the field for over 35 years.
